## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Figures 1A, 1B, and 1C are directed towards a fluid volume sensor of the present invention.
- Figure 3 is directed toward a fluid volume sensor in combination with a pneumatically or hydraulically driven pump.
- Figures 4A and 4B are directed toward a fluid volume sensor in combination with a mechanically driven pump.
- Figure 5 is directed toward a combination of fluid volume sensors in combination with a mechanically driven pump.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, *and a listing of all claims readable thereon*, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of

Art Unit: 2856

an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

### *Response to Remarks*

The reply filed on 04 April 2003 is not fully responsive to the prior Office Action because: Applicant was advised that a reply to the restriction given, which was repeated above, must include an identification of the species that is elected consonant with this requirement, *and a listing of all claims readable thereon*, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic would be considered nonresponsive unless accompanied by an election. Though an election was made to Figure 3, without traverse, the applicant *did not* list the claims readable thereon.

Since the period for reply set forth in the prior Office action has expired, this application will become abandoned unless applicant corrects the deficiency and obtains an extension of time under 37 CFR 1.136(a).

The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. In no case may an applicant reply outside the SIX (6) MONTH statutory period or obtain an extension for more than FIVE (5) MONTHS beyond the date for

Art Unit: 2856

reply set forth in an Office action. A fully responsive reply must be timely filed to avoid abandonment of this application.
